Dear Mr. Ostrander,

From the media, I learnt about the situation at the Gold King Mine, Silverton, CO and I got that you are the director of emergency preparedness for the region (Denver). I am writing you because the long-term effects might require the help of professionals, specialized in solutions for heavy metal pollution.

Xenviro AG, Switzerland, <http://xenviro7.xenviro.com/en/> and Virotec Pty Ltd, Australia, <http://virotec.com/> would act jointly on this case. Being very strict on sustainability, both companies have strong ties to science. This fact and numerous solutions in this area undoubtably make us the most qualified companies world-wide to deal with such pollutions in a professional way and deliver a sustainable solution to the specific situation. To underline this statement, I have attached a letter of the U.S. EPA to Virotec, detailing the findings of the EPA. Also attached, you will find some technical papers and casestudies.

Especially I want to point out to the Baia Mare (Romania), Gold Mine Emergency, of which you will find both the case study and a link to the film about it (following below). You will see more than one similarity between the Baia Mare Gold Mine Emergency and the Gold King Mine, Silverton, Colorado

Films:

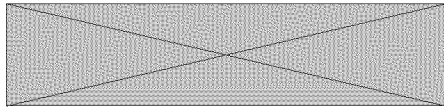

- Baia Mare, Romania, Gold Mine Emergency:

- Technology: <https://www.dropbox.com/s/fikse8ffjo8iksx/Video%201%20-%20Bauxsol%20Technology.mpg?oref=e>

In case you are not the right contact, would you please let me know the right person to whom I should talk? Thank you.

Best regards,

Ernst D. Froehlich

Senior Partner, Project Manager
